

Your fundraising will make a big difference

£10

Could give a fisherman living on the shores of Lake Victoria access to solar power for a year, allowing them to refrigerate their fish and demand a fair price.

.....

£25

Could provide two families in Nepal with access to solar-pumped water for a year, available from a tap stand located right outside their home.

.....

£51

Could pay for the wiring and fittings needed for a house to receive electricity for the first time from a community owned and managed solar microgrid.

.....

£120

Could pay for a tap stand to be installed outside 10 family homes, saving the women and girls in those families precious hours each day on water collection.

.....

£500

Could provide one community in Nepal with agricultural training and tools, helping them increase their income by growing cash crops, and benefiting up to 500 individuals.

.....

£921

Could buy three batteries for a solar microgrid in Kenya, helping to ensure that the electricity can be accessed day and night, even when the sun is not shining.
